Have you had a HIV blood Test	Yes	No	Date	Result:
-------------------------------	-----	----	------	---------

Do you have reason to believe that you may have been exposed to HIV infection in any of the circumstances listed below?

1. If you are male, engaging in unprotected sexual intercourse with another man;
2. Having unprotected intercourse in, or with a person who has been exposed in a country where transmission of HIV through sexual intercourse between men and women is common;
2. Shared injecting equipment while mis-using drugs.
3. Engaged in invasive medical, surgical, dental or midwifery procedures in parts of the world where infection control precautions may have been inadequate, or with populations with a high prevalence of HIV infection;
4. Had significant Occupational exposure to HIV infected material in any circumstances.
6. Had unprotected sexual intercourse with someone of any of the above categories.

YES	NO	Discuss further	Notes:
-----	----	-----------------	--------

IMPORTANT A health care worker who has any reason to believe they may have been exposed to infection with HIV, in whatever circumstances, must seek and follow confidential advice from the Occupational Health Services. Failure to do so, may breach the duty of care to patients.

A validated sample of blood is required for HIV testing for the following category of employee. Please send documentation with this form if you have been tested. If you have not been tested:

- All EPP (Exposure Prone procedures) workers who are new to the NHS and who will perform EPPs.
- Existing workers who are new to EPP

All health care workers who are new to the NHS will be offered an HIV antibody test.

HEPATITIS C				
Have you had a Hepatitis C antibody check	Yes	No	Date	Result:
Do you have reason to believe that you may have been exposed to Hepatitis C infection in any of the circumstances listed below?				
<ol style="list-style-type: none"> 1. Receipt of unscreened blood or untreated plasma products (in the UK before September 1991 and 1986 respectively); 2. The sharing of injecting equipment while using drugs; 3. Having been occupationally exposed to the blood of patients known to be infected with hepatitis C, or deemed to be at high risk of infection, by sharps or other injuries (and not subsequently screened and shown to be non-infectious); 4. Receiving medical or dental treatment in countries where hepatitis C is common and infection control precautions may be inadequate. 				
YES	NO	Discuss further	Notes:	
<p>IMPORTANT A health care worker who has any reason to believe they may have been exposed to infection with Hepatitis C, in whatever circumstances, must seek and follow confidential advice from the Occupational Health Services. Failure to do so, may breach the duty of care to patients.</p>				
<p>A validated sample of blood is required for Hepatitis C antibody testing for the following category of employee. Please send documentations with this form if you have been tested:</p> <ul style="list-style-type: none"> • All EPP (Exposure Prone procedures) workers who are new to the NHS and who will perform EPPs. • Existing workers who are new to EPP <p>All health care workers who are new to the NHS will be offered a Hepatitis C antibody test.</p>
